

MANP CALL FOR POSTER ABSTRACTS

MANP invites you to submit an abstract for a Poster Presentation at the annual meeting July 26-28, 2021 in Gulf Shores, AL. Appropriate submissions include Research Projects and Evidenced Based Practice Change Projects. Each abstract should be no more than 350 words and include at least 2 measurable objects. Preference will be given to topics related to Advanced Nursing Practice. **Please attach an abstract with your application deadline is June 1, 2021. Return msanp@msanp.org to the attention of Robert Ware.**

Research Poster Abstract: Research Poster abstracts typically include the following key elements:

Purpose —What was the intent or goal of the study? What did you want to learn?

Background/Significance/Review of Literature —What was the problem and why was it important? What knowledge are you building on?

Research Question or Hypothesis

Method —What was the design? What was the sample? What instruments were used? How was data collected and analyzed?

Results —What were the findings? Conclusions —What do the findings mean?

Evidence-Based Practice Project Abstract

Criteria: An Evidence-Based Practice (EBP) Poster may be the result of a practice change project where an applied process achieves a desired outcome or meets a benchmark for a practice standard. An EBP poster usually is complete but may be at any stage in the project process if the background, clinical question and process is considered of high clinical significance. Most of the following elements are generally included:

Purpose —What was the intent/goal of the project? What problem was addressed by the evidence-based solution?

Background of the Project--What is the importance or significance?

Clinical Question—What are you trying to determine?

Description —What was the evidence-based solution? What was the clinical question? How was it developed and implemented?

Review of the Literature for the evidence implying how you made a clinical decision based on the best available current research or literature to change a process to improve practice.

Evaluation and Outcomes (If project is complete)—What were the outcomes of the project? How was success measured. Or What are the expected outcomes?
